

## **Company Profile**

---

[www.segalnet.net](http://www.segalnet.net)

SegalNet was established in 1999 as a non-governmental, cultural ISP in Tehran, Iran. Like many major enterprises, the pioneers of SegalNet started out as a small group within SegalNegar Company with one objective: optimizing communications and internet access in Iran.

SegalNet is now a leading company in the fields of telecommunications, networking and internet access. It provides consultancy services, network planning and deployment services to Telecommunication Company of Iran (TCI), Telecommunication Company of Tehran (TCT) as well as to the new upcoming service providers. SegalNet keeps a strong business partnership to these companies and counts it as a strong value.

SegalNet is also a leading internet provider of value-priced Internet access. The company's services are offered at less than the standard prices of its major competitors. The mission of Segal Net is to provide consumers with high-quality Internet access and Voice over IP (VOIP) that fit both their needs and their budgets. SegalNet has a unique and efficient business model featuring proprietary technologies that enable it to provide members and corporate partners with a service that is designed to meet member's individual needs.

Segal's main field of activity is within Tehran but operates globally as it has founded Several ISP's all over Iran. Segal's subsidiaries handle related works in software design, satellite services, networking and web Design as well as Internet Services and VOIP.

Segal is the fore-front of technological achievements and also an active member of New Net Corporation and Iran ISP association
